Mcfk - carbon par excellence

Instruction manual: ISP mount

Important installation instructions:

We congratulate you on your purchase and thank you for your trust in our products. Your new carbon ISP withstands highest stress and has been made to the latest and most efficient methods of design and manufacture. This includes special features that must be considered for installation.

Please read these instructions carefully and make sure that they are observed.

As a buyer of our carbon products, you are certainly aware of the importance of the careful installation of your new carbon tube.
If you feel uncertain about the installation of your new ISP, please contact us or your nearest dealer presenting these installation instructions.

Tighten the screws of the seat clamp maximum to **5 Nm**. Tighten the screw at the ISP mount maximum to **5 Nm**. If the frame manufacturer recommends higher tightening torques, these normally are for thick-wall aluminum mounts. If the frame manufacturer recommends lower tightening torques for the integrated seat post, the frame manufacturer's tightening torques apply.

Tightening torques are low and so special installation compound for carbon (**do not use installation grease!**) can help improve the reliability of clamping.

From practical experience we recommend applying some Loctite thread locker (light or medium) to the screw thread. This ensures that the screws cannot come loose even during rough rides.

As you can see in the drawing, the setting range of your new ISP is limited to 30 mm (standard model). Never clamp your new ISP mount outside this area - you damage your new ISP mount (even if you will not see the damage directly) and pose an enormous safety risk yourself and for other riders.

Non-compliance with these installation instructions or of the specified maximum tightening torques voids your warranty and any claim under it and exposes you and others to an incalculable risk.

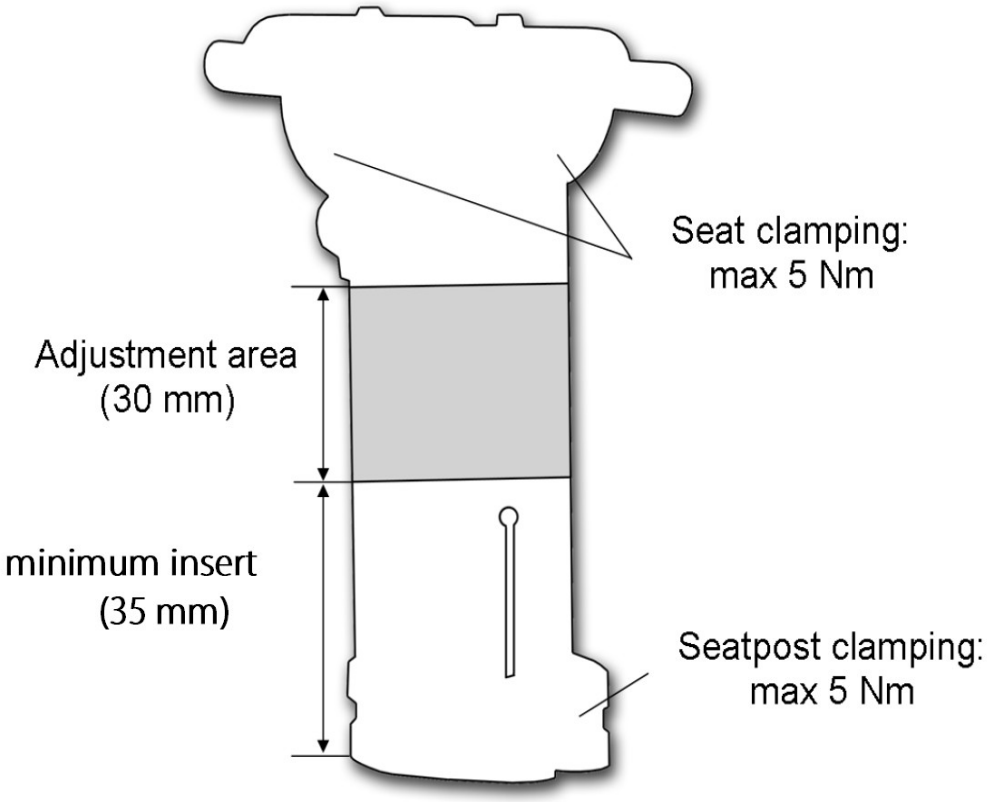
Mcfk - carbon par excellence



Warranty:

We grant a warranty of two years from the date of purchase of our products. Warranty claims can only be accepted if a (copy of the) dealer invoice is available.

The warranty covers defects of material and workmanship; it does not cover defects due to:
Normal wear and tear
Improper use
Non-compliance with the instructions for use.

Warranty claims must be settled on site and are at the discretion of the firm Mcfk. The warranty granted by the firm Mcfk does not include compensation of damage; particularly any indirect damage in connection with an accident, any other indirect or consequential damage are excluded from our warranty.

The satisfaction of our customers is important to us. For this reason, we usually treat problems with our products very generously, also outside the warranty period.
Please clean and return the parts and add a brief written account (including your contact data) and a copy of the invoice of the consignment.
